-Jim> A couple concluding points from his letter to consider:

-As a pediatrician, a father, and a grandfather, I must do my part to protect the integrity of the immune ecosystem in children and to protect Humanity from the adverse effects of an ill-conceived mass vaccination campaign. Hence, this Open Letter.

-For the sake of our children, grandchildren, and all of humanity, we have an individual and collective social responsibility to call for an immediate and complete halt to the current COVID vaccination campaign, on a scientific basis alone, until an appropriate COVID Commission is convened to thoroughly and accurately evaluate the COVID situation. In the meantime, current scientific evidence strongly suggests that to participate in the continuation of the COVID vaccination campaign—to promote it, to remain silent about it, or to personally receive further COVID vaccination—is to contribute to the harm of children and humanity, as well as harm to oneself.

CHILDHOOD VACCINES...

Jim>I never questioned childhood vaccines in the past. I received vaccines as a kid, and we made sure our five kids received their vaccines. I question them now... The lies, corruption and censorship surrounding the Covid vaccine opened my eyes. Now I'm a new grandpa for the first time. My wife and daughter insisted that I watch the movie "Vaxxed 2". OMG...what are we letting them do to our children?! If you're a parent or grandparent, or ever will be, you must watch this movie. And pass it along to others you know who will have kids. This movie is heartbreaking and it's Crimes against Humanity what medicine and government are doing.

Opposition to Childhood Vaccine Mandates on the Rise, More Parents Say They Want the Right to Choose

Jim> More questions on childhood vaccination? Check out information presented by Candace Owens. No, she's not a doctor or a scientist. Yes, she has been highly criticized and mocked for this series. The truth is, Candace is well educated and extremely intelligent. Her research into each of these episodes is excellent. I sincerely believe that the folks discounting her have not watched the episodes. The information she presents is based on facts and legitimate medical studies. The information she presents should be heard by parents considering vaccinating their children.

5 Facts to Consider Before Vaccinating Kids for COVID

Very few children get seriously ill or die from COVID-19. The risk of COVID-19 shots likely outweighs the harm of infection. Two years into this pandemic, the need to inoculate children is nil. Simple as that.

Worth It? Risks and Benefits of Child Vaccination Against Covid-19 in Iceland

The researchers followed the outcomes of all children diagnosed with Covid-19 during the study period. They found that infections in schools were rare, no child was hospitalised with Covid-19, and none had severe symptoms. This study supports the results of a large Swedish study conducted in 2020 on nearly two million children.

FDA, CDC Sold Out America's Children — Could Their Betrayal Bring Down the Entire Childhood Vaccine Program?

By authorizing COVID-19 vaccines for young children on the basis of shoddy data, public health officials proved they're in the business of protecting pharma's profits, not people — and once enough people realize it, the entire childhood vaccine program will be finished.

CNN Misleads Parents, Follows Mainstream Script to Push Vaccines for Young Kids

Mainstream media is following a tried-and-true script to push vaccine uptake. Now that COVID-19 vaccines are authorized for children ages 5 to 11, we can expect more disingenuous and misleading commentary designed to reinforce the "safe and effective" messaging — this time our children are the targets.

Excess mortality in UK children observed after vaccine rollout... the shots appear to be causing children to die

Snippet from article:

The vaccine rollout began on the 30th week of the year. A look at data from the UK's Office of National Statistics indicates that the number of deaths in children aged 10 to 14 between weeks 38 and 41 of this year were *62 percent greater than the five-year average of deaths in the same age group during the same period of time*. In addition, the rise began just as children started getting the jab.
