Joe Biden Signs GOP-Proposed Bill Ending Covid-19 “National Emergency”

<https://www.thegatewaypundit.com/2023/04/joe-biden-signs-gop-proposed-bill-ending-covid-19-national-emergency/>

Jim>Yes DONE...But so many lives lost because they refused to listen to the voices that were finding treatment options... So many lives lost because they pushed a new barely tested “medical product” on people, ignoring the countless adverse events and thousands of deaths that it was causing. Even mandating it to people forcing them to get it to keep their jobs... And over two years later, the deaths due to this “medical product” continue to add up, and they refuse to acknowledge it and even continue pushing it. Shame. History will not judge these people that led us through this mess lightly.

Hello all,

I wanted to preface today's postings by first letting you know I'm going to have to scale back on my daily Covid postings. I've had several large projects kick off at work this week, and I'm not going to have the time to read, compile and post as I have been doing. I'll still try and post the most important info I run across, but it might not be every day.

I appreciate everyone that has subscribed and read the posts, and especially the one person that actually paid for a few months. That was never expected, but appreciated that someone found the compiled info important enough to send a few bucks my way (and a few bucks for Substack). It was never about paid subscriptions though. I allowed for those just because I appreciated that Substack gave us this free opportunity to post, and figured if someone wanted to pay, it would be of benefit to Substack. My whole purpose for this (my old website and this Substack) was to have a record of what I was reading that was a legitimate counter to the narrative being forced on us all. I also wanted to make it easier for family, friends, and everyone else, to find this info so they wouldn't have to scour all these websites daily like I was doing. Hope it has been of benefit to you. ...And I will keep posting occasionally as time allows. So thank you Substack for providing this platform, and thank you all for reading. May God bless you and your families.

-Jim

State officials across the nation can help usher in the "new generation of Republican leadership" that Governor Sanders described. Jim>My comment to Dr. Alexander article above: Thanks for writing this, you're spot on for every point...he thinks some of us were irrational...no, we looked at ALL of the evidence not just one side, and made our decision that come hell or high water, we're not taking that job. Our lives have been turned upside down, we were hated, called murderers, because of taking this stand "for the whole truth". I appreciate that some who previously advocated for the shot are finally seeing the truth (or finally "admitting" to the truth - I think they knew it all along but were afraid to speak the truth). But I have to be honest, it is troubling that they're only doing so after it's starting to get safe. They see the tsunami of truth heading in and are jumping sides before it hits for all to see. We should forgive but we will never forget. And we will always remember the scientists like you Dr. Alexander, Rose, Kirsch, Hirschhorn and the MD's like McCullough, Malone, Geert (DVM), Kheriaty, Kory, Marik, Midwestern, Zelenko, Cole, Nass, Mercola, AK Seyd, Milhoan and others, who stood with us arguing for truth, trying to save lives. We couldn't have done this without you all. We are forever grateful. Thank you.

The Jaywalker and the Covid Police

Like the ticky-tacky crosswalk cop, people should have tuned out the Covid "experts" and politicians from the beginning and instead trusted their own observations and common sense. Instead of heavy-handed, top-down, theatrical top-down mitigation measures, society would have been far better off if people had been allowed to live normally. The experts' advice and government mitigation measures were—and are—nagging, nugatory and negative.

Fauci Wanted Universal Human Separation Forever

One might suppose it would be top headlines that the man who crafted the Covid response for the world was merely using this as the lever to reverse 12,000 years of human history. Indeed in that sense, "going medieval" is a mere step in a long road back. Forget the Constitution. Forget the Enlightenment. Forget

even the golden age of the Roman Empire. Fauci wants to take us back long before there are any actual historical records: a conjectural Rousseauian state of nature where we lived by foraging for food around us and nothing more.

Tomás Pueyo Returns: The MBA Who Shut Down Europe on Masks and the Cochrane Review

To this day, it remains unclear where Pueyo got the ideas for virus containment for his 2020 articles. To some degree, Pueyo's ideas mirrored those of major lockdown proponents like Imperial College Professor Neil Ferguson—architect of the wildly-inaccurate COVID models that instigated lockdowns across the free world—who'd already endorsed global lockdown measures. Yet outside of a niche epidemiology community, these ideas were far from well-known. For the most part, it wasn't until Pueyo's articles that these ideas for strict virus containment measures reached the mainstream.

How We Know it Started in Wuhan

It does appear that the December outbreak in Wuhan where it was first detected was the largest to that date. In addition, the following month Wuhan was the first place to experience an explosive outbreak that taxed the health services, some weeks before anywhere else. The fact that it was ahead of the curve in these larger outbreaks is a strong indicator that the virus had been there longest and originally emerged there.

Testimony to the Senate of the Republic of Mexico

The clearly arbitrary and capricious US Government and WHO mismanagement and over reaction to the COVIDcrisis, to Monkeypox, and to many other infectious disease outbreaks in the past demonstrate that neither US nor WHO have the organizational maturity and capabilities to merit conceding Mexican public health sovereignty to these organizations.

Jim>Another report on childhood vaccines. Snippet on the scientist studying this issue: "Gary Goldman was in charge of the CDC's largest vaccine monitoring program, but when he started reporting problems, they literally locked him out of his office. He was not fired, just not allowed in the building! He would come to work, sit on the bench outside, and do his work from a bench! Because that's how science works at the CDC. If you go against the narrative, you are punished. That's how they keep people in line with the narrative, no matter how absurd it is."

The Banality of Evil

On the COVIDcrisis and the Limits of Empire

By Robert W Malone MD, MS

<https://rwmalonemd.substack.com/p/the-banality-of-evil>

Jim>Below is my comment on Dr Malone's post:

Dr. Malone, this is exactly what I have been thinking. The bureaucracy and everything that supports it is the problem. It was meant for well, to alleviate every ill, but it is now an out of control beast. I've been contemplating for years now how this can be corrected, and I don't think it can, not without a terrible crash. I think what we're actually seeing here is "the futility of man". Our govt "by the people and for the people" was supposed to be the perfect form of govt, but we know that nothing by man is perfect. Corruption, evil, etc will always find a way into our plans and deeds. That futility is what we see over and over again in the Old Testament of the Bible (while at the same time pointing to the future answer to this problem), and then in the New Testament we finally see the ultimate hope we do have in Jesus Christ. Only God can correct this futility. These past few years have made this so clear to me.

Jim>And this post by Dr. Milhoan is the perfect follow up to Dr Malone's above.

Masks Did Not Do Nothing; They Wrought Havoc

The behavioural scientists deliberately exploited the human desire to conform and literally said out loud that the public would 'do the heavy lifting' and enforce masks using social pressure. This was the case: if you refused to wear a mask, people stared or even shouted. Twitter shouted #WearADamnMask. Venues denied entry. GPs refused medical appointments to the unmasked.

It's Insane that Colleges Still Mandate Vaccines

Even with the pandemic clearly over, the FDA continues to issue emergency-use authorizations for COVID-19 vaccines and tests. We have no idea what any of this means for college mandates, but we do know that after three long years, we have had enough. Students and parents will no longer be silenced. If college bureaucrats aren't willing to end their reckless and outdated COVID-19 policies now, parents will shift their support to colleges that do.

The Freedom Not to Wear a Mask

The simple truth is that the one-size-fits-all approach didn't protect us from the virus as much as it blinded us to its reality; one that only could have been arrived at via freedom. We didn't need medical studies, and the reality is that still we don't need medical studies. What we needed and need is freedom. With the latter once again comes knowledge from different people doing different things, and all of us learning from their successes and failures.

The Sanctuary in Action

So much needs to be rebuilt after the last three years, but among the needs are serious intellectual communities. The colleges and universities have, for the most part, been taken over or smashed. The major media is captured. Our companies are forced into an obsequious stance. Our previous networks have been shattered. For lovers of freedom, we've experienced something of a diaspora.

“No doubts evil is hard at work in the West and around the world. It is even being bold in exposing itself now. As a born again Christian I have no illusions that we will be spared going through these difficult days, but I do trust God will never abandon me as I go through it. Remember, Man, Thou Art Dust

Calls for general amnesty or accusations that those of us who got things right only did so through luck are lame attempts at self-absolution. To apply the logic of the confessional: there can be no reconciliation without contrition and firm purpose of amendment. Dr. Fauci Comes Clean on Vaccines and Respiratory Viruses

Fauci and co-authors therefore make an important contribution to the Covid narrative, underlining the deception of the past two years. Claims that this deception promoted an overall good – that there was a ‘global pandemic’ and compliance with mass vaccination would be for the population’s benefit – are refuted by Fauci et al.’s evidence. Mass vaccination, while very successful financially for a small but influential minority, was never expected to work.

The Unforgivable Sin

We must judge the authorities all over the world who relentlessly pumped out panic-laden, often knowingly false propaganda during the past three years, in order to provoke fear and despair, while deliberately silencing and censoring all attempts at promoting a more balanced and healthy view; how they stifled critical thinking. And it is in this light that we must view the disastrous consequences of this conduct, and how it first and foremost harmed the young, the poor; our smallest brethren.

There Must Be Investigations

Eight leading critics of the United States's COVID-19 response have called for an investigation of the many failures of policy architects and key decision makers — at institutions ranging from the Centers for Disease Control and Prevention and Food and Drug Administration to universities and hospitals — over their repeated mishandling of the pandemic.

Superego, Id, and the Mandated Job

Vaccine mandates hit hard in the late summer and fall of 2021. Get the job or lose your job. Health care workers and public sector employees had it especially bad. Somehow it seemed right. If you are interacting with the public in a health capacity, you need to be sure you won't infect anyone. If you are a government employee, surely the government should be able to tell you what you have to take to make everyone else safe.

Focused Protection: Jay Bhattacharya, Sunetra Gupta, and Martin Kulldorff

In the early months of the pandemic, scientists concerned about lockdowns feared “coming out” in public. The GBD partners took one for the B team and did the dirty work. They paid a heavy price for it, including the loss of some personal friendships, but they held their ground. In print, on air, and on social media, Bhattacharya continues to describe lockdowns as “the single worst public health mistake in the last 100 years,” with catastrophic health and psychological harms that will play out for a generation.

Unmask the Audiences Already!

People no longer have an emotional connection while speaking when wearing masks. And we can no longer understand each other’s speech. A venue full of masked people is a place lacking in humanity. It is an artificial world based on virtue-signaling and the elevation of appearance over reality, rather than actual human connection.

Wartime Parallels: Iraq and Covid

First, the resort to emotional arguments and moral blackmail generally implies that they have little reasoned argument and evidence to support their case and are deflecting to bluster instead. Second, whenever we are presented with excitable exclamation marks (Saddam Hussein already has weapons of mass destruction (WMD)! He can hit us with WMD in just 45 minutes! Coronavirus could be more cataclysmic than the Spanish flu! The sky is falling!), it is a very good idea to substitute sceptical question marks instead:

Three Years In, How Did the Lockdowns Go?

The lockdowns did not improve health outcomes. They did devastate economic outcomes. And economics is part of health which in turn is a reflection of the quality of life. The same results pertain however we shuffle the data: adjusting by age, adjusting by population, adjusting by population density. The conclusion is completely undeniable. Lockdowns were a disaster and they achieved nothing in terms of their stated purpose.

The UK Fantasy of 510,000 Lives Lost

The 510,000 figure, which turned the world on its head, was a fantasy number churned out by absurd modeling of a zero-probability event. The main way in which Mr Cummings, and in this respect he is a significantly representative figure, is going dreadfully wrong is that, when judging government policy as a response to emergency, he does not see that the reason why the SARS-CoV-2 outbreak escalated into the public policy catastrophe that it became was the fundamentally flawed Imperial College London modeling on which the government based its response.

Covidianism Inverts the Heroic Archetype

The myth of the hero does not teach us to eradicate life's pains and risks in pursuit of only comfort and safety. That is the doctrine of the animal. Rather, the myth of the hero shows us that it is necessary to embrace suffering and risk in order to experience life's miracle; and that, for such a transcendent reward — for such excellence — that is a price worth paying.

Fact-Check This, Facebook

The Covid Coup Attacked the Right to Travel

There was a coup d'état in this country that presented itself under the innocuous banner of "public health." Our country's most powerful forces – including information centers, unelected officials, and multinational corporations – worked together to unravel the protections of the Constitution. Among them was the longstanding precedent of the right to travel and its replacement by tyrannical house arrests.

The Tragic End of Laughter

It's pretty hard to laugh when you've been inoculated with fear and isolation. Paralyzing gaslighting was the starting point. But the constant and continuing drumbeat of fear and necessary isolation transcend simple gaslighting. Fear and isolation were beneath the plunger being pushed down hard in the first needle forcibly stabbed into the world's arms. And, that original fear-and-isolation inoculation of stress provided the opportunity for more tangible inoculations. Denial of natural immunity amplified any justification for, if not providing an outright blessing on many of these outrages.

Why has the CDC been lying about this for the last two years and insisting that the mRNA "stays in the arm?" Well, the obvious answer is that the idea of the mRNA staying at the injection site is reassuring, since otherwise we could fear systemic adverse effects of precisely the sort that have emerged since rollout.

The Speakeasy World of Covid Lockdowns

In Speakeasy World, people were aware that they lived in a panopticon. But they realized that the one and only guard was probably checking TikTok on his mobile phone during working hours instead of surveilling prisoners. The prisoners made a calculated bet that the guard was not paying attention to their transgressions.

Shouting Covid in a Crowded Theater

The Covid Leviathan stripped Americans of their First Amendment rights and divided them as well. Bureaucrats worked to stifle journalists who reported on inconvenient facts, President Biden attacked his own citizens as unpatriotic, and Anthony Fauci coordinated attacks against scientists who dared to challenge his authority.

<https://brownstone.org/articles/shouting-covid-in-a-crowded-theater/>

The Political Became Very Personal

The scars that have been left on all of us by the response to COVID are incomprehensibly varied and deep. For most, there hasn't been enough time to mentally process the significance of the initial lockdowns, let alone the years-long slog of mandates, terror, propaganda, social stigmatization and censorship that followed. And this psychological trauma affects us in myriad ways that leave us wondering what it is about life that just feels so off versus how it felt in 2019.

Jim>I totally agree with Dr. Malone's stance on 5th gen warfare. The new battleground is people's minds, and everyone can and should be a warrior. We can never give up on "fighting" (not physical, but persistent) to get people to see both (all) sides of a story, which means fighting against censorship in whatever way we can, so that the people can find the truth. The people's lives, their children's lives, and living free and healthy are at stake.

Jim>Dan Bongino had a great interview with Dr. Malone on his Friday podcast. Big takeaways for me were: 1. While he doesn't like the Died Suddenly documentary (probably due to his relationship with the producer), he does confirm that the fibrin clots are a thing. 2. Cardiologists are running into hard clots in the heart that they can't get past to place stents. 3. The heart heals by forming scar tissue. When electrical signal travels through the heart causing muscle fibers to move uniformly to pump, when that signal hits scar tissue it traverses it at different speed, then when it gets past scarring to normal tissue, it's not in sync with other muscle with the original speed signal and at stressful times causes heart to stop. ...Again, it's an excellent interview - only 25min or so.

It All Began with Fear

When Covid-19 came along, Laura Dodsworth grew alarmed—not at the virus, but at the fear swirling around it. She watched the fear grow legs and wings and wrap itself around her country. What troubled her most was that her government, historically charged with keeping people calm during times of crisis, seemed to be amplifying the fear. The media, which she had expected to push back against government edicts, gave the fear train an extra shove.

Covid Insider Farrar and His Eugenics Agenda

Let's call a spade a spade and go back to calling this what we used to call it – eugenics. And be ever mindful as the WHO pandemic treaty and vaccine passport projects continue, with the potential for your DNA to become the means by which your identification is verified, that the man who will soon be in charge of setting the global agenda for it is Sir Jeremy Farrar.

How Government and Big Tech Colluded to Usurp Constitutional rights

Not only did the government turn its capability on the American people, but it recruited the most powerful information companies in the history of the world to advance its agenda, leaving American citizens poorer, stripped of their rights, and left with no place to hide.

Amendments to WHO's International Health Regulations: An Annotated Guide

The amendments to the IHR are intended to fundamentally change the relationship between individuals, their country's governments, and the WHO. They place the WHO as having rights overriding that of individuals, erasing the basic principles developed after World War Two regarding human rights and the sovereignty of States. In doing so, they signal a return to a colonialist and feudal approach fundamentally different to that to which people in relatively democratic countries have become accustomed. The lack of

major pushback by politicians and the lack of concern in the media and consequent ignorance of the general public is therefore both strange and alarming.

Blindsight Is 2020

Epidemiologists can do epidemiology. Public health experts can do public health. But none of these experts can do society or human nature any better than intellectuals from other disciplines or even “ordinary people.” No scientist has the legal or moral authority to tell someone they can’t sit next to a parent on their deathbed.

Eugenics, Then and Now

We have solid historical and contemporary proof that eugenic ambitions are capable of sweeping up the most elite intellectuals and policy circles. The dream of curating the population by force to make it more fit is a historical reality and not nearly as discredited as people tend to believe. It can always make a return in new guise, with new language, and new excuses.

How Two Conflicting Covid Stories Shattered Society

The two stories continued to unfold in tandem, the gulf between them widening with each passing month. Beneath all the arguments about the science lay a fundamental difference in world view, a divergent vision of the type of world needed to steer humanity through a pandemic: A world of alarm or equanimity? A world with more central authority or more personal choice? A world that keeps fighting to the bitter end or flexes with a force of nature?

Pilots are dying at Southwest Airlines at over 6X the normal rate after the COVID vaccines rolled out

I thought the vaccines were supposed to reduce death not increase it! I just asked the FAA for their comment on this. Here's what I wrote:

What is the chance that Damar Hamlin's injury was caused by the vaccine? 100%!

Pfizer Might Mutate SARS-COV-2 Behind Closed Doors To Make Their Shots Bigger Cash Cows

By: Dr. Byram W. Bridle

Jim>Another excellent article from "AMidwesternDoctor", long but good! Count me, and most of my immediate family among those whose eyes are opened to the narrative being forced upon us in so many ways. We see their lies and manipulations. We have lost our trust in so many institutions. Thankfully we have found alternative sources for truthful information. We have found medical doctors and other services that are not trapped in narrative think. I agree with him (see snippet from article below), I do think there is going to be a big change soon as more people have their eyes opened. The truth is busting through, and when millions upon millions realize what has been done to them, there is nothing the authorities will be able to do to stop the change. That's what I'm hoping for anyways... Here's a snippet from his conclusion: "One way or another, a lot of large changes are going to happen this year. Many are now willing to pay for a better form of medicine (e.g., one that does not involve annual COVID-19 boosters) and to publicly share their distrust of the mainstream narrative with others (along with institutions [like the FDA](#)). These are very powerful social forces, and it is my sincere hope that each of you can help us work towards making those changes that transpire this year be positive ones..."

Why N95 Masks Fail to Stop the Spread

By examining the hypothetical best-case scenario, we can better predict if a given measure will have a mitigating impact on the identified hazard. For N95s versus output, particle- to- PFU ratios, and MID for SARS-CoV-2, best-case scenario of hypothetical perfect capture of matter that these apparatuses are neither designed nor approved to capture shows them to still be non-mitigating for this hazard, and recommendations for their use should be immediately reconsidered.

Vaccine Immunologists Starting to Resemble The Academy of Projectors in Gulliver's Travels

By: Peter A. McCullough, MD

<https://petermcculloughmd.substack.com/p/vaccine-immunologists-starting-to>

-snippet from Dr. M's article above:

"I'll let the immunologists debate about the significance of this finding and limit my commentary to a few basic observations.

- 1). The paper is further evidence that the developers of the COVID-19 mRNA shots did NOT understand precisely how they would affect the human immune response.*
- 2). The developers of these products had NO IDEA how they would affect the immune response after three shots.*
- 3). The developers of these products cannot know what will happen in the event of IgG4 antibody prevalence because they have never observed it before."*

-and then the first sentence of a comment hits the nail on the head: "It's basically working like an allergy shot to desensitized people to covid."

How can you generate far more deaths in 2021 – ascribing them to unvaccination – with a dramatically smaller number of unvaccinated people? Lockdowns Were Counterterrorism, Not Public Health

Anyone who knows what our Covid response policy truly was is theoretically barred from revealing it. We do know the public health agencies were not in charge of the policy, and we know they were pushed out of their leadership role in coordinating and implementing the response. So Fauci et al. are technically correct if they claim no responsibility – although how they could in good conscience advocate such policies is another matter.

Ethical Challenges Arising from the Grand Illusion

The preliminary results of the mRNA vaccine randomized controlled trials (RCTs) by Pfizer and Moderna were celebrated as spectacularly successful and so governments and the media assumed that the solution had been found. A procession of leaders assured the public that the vaccines were so effective that once injected, you would not become infected or pass infection on to others.

FOIA Doc Shows BioNTech Founders Postdated Start of C19 Vax Project

Why did Sahin and Türeci postdate the launch of their Covid-19 vaccine project in their book? Well, undoubtedly because the actual start date – and we do not know when exactly the actual start date was – would have seemed far too soon. Based on the above considerations, it must have been at the latest just days after the first December 31, 2019 report of Covid-19 cases in Wuhan.

The Cancer that is Public Health

This cancer of conflicted interests has infiltrated far beyond public health; the media and governments have been dutifully trotting off to the Davos club for years. Whilst the functions of international health appear to be leading the degradation of society, the sector itself seeks to grow at an unprecedented rate. Let us hope, for all our sakes, that the rest of society can recognize the rot within, and find the strength to cut it out before it drags us all down. We cannot let those fueling this rot destroy what so many worked so hard to build.

Jim> Wow. This is an amazing letter that beautifully sums up the new world order take over we're currently experiencing. The people will eventually wake up, but for most of the world, modern tech and no way to defend themselves will make it very difficult and painful to resist it. In the US, if we are able to keep our 2nd Amendment right, there might be hope. But the globalist cabal probably has a plan to take that hope off the table too.

The history of failed HIV vaccine trials confirms that overvaccination causes class-switching towards non-inflammatory IgG4 antibodies, reducing the effectiveness of the immune response

Our mRNA Covid vaccines have caused exactly the same IgG4 class-switch, presumably in billions, whose immune systems have similarly been taught some measure of tolerance towards the spike protein

By Eugypius (anonymous German academic)

<https://www.eugypius.com/p/the-history-of-failed-hiv-vaccine>

Snippet: "However that may be, the HIV vaccine research teaches us that IgG3 antibodies are crucial for effecting a broader immune system response to infection, that excessive vaccination impairs IgG3 as more antibodies switch to IgG4, and that this class-switch is associated with reduced effectiveness against infection."

"Our mass mRNA vaccination campaign against SARS-2 have induced exactly the same IgG4 class switch in untold billions of people."

Jim>Excellent report to add to recent ADE findings. This one explains how the IgG4 antibody causes heart tissue damage. They warned FDA and vaccine makers about this multiple times in 2020.

Long before EUA, FDA and vaccine makers were warned about induction of inappropriate IgE and IgG4 antibodies by COVID vaccines. They ignored it. Prediction comes true, with devastating consequences.

These basic immunology concepts have been understood for years based on research into parasite infections, vaccine induced food allergies and autism.

The Censorious Scott Gottlieb Was a Major Influence on Lockdowns

The person and role of Gottlieb is a paradigmatic case of why and how solving the mysteries of the lockdowns and mandates is such a complicated undertaking. It's not just about government intervention and it's not just about private corruption. It's about a complicated relationship between the two, involving a range of public and private actors in and out of government who seized control of the policy machinery to achieve private ends at enormous public expense.

A Compendium of the Latest COVID-19 News, Facts & Features

<https://flccc.substack.com/p/the-fda-waited-months-to-tell-the>

1. Dr. Pierre Kory, President and Chief Medical Officer of the FLCCC, discussed the possible causes of Buffalo Bills safety Damar Hamlin's sudden cardiac arrest on the football field. This led to a deeper dive and [an impassioned 'rant'](#) on the need for a broad public conversation and media scrutiny about all the sudden death that is happening around us.
2. *FDA researchers saw safety signals for two serious conditions among elderly persons following vaccination with Pfizer's COVID-19 vaccine on Feb. 27, 2021, the researchers [disclosed in a new study](#).*
3. For 35 years, it was hailed as a miracle drug and positively impacted the lives of millions of people around the world. But many governments are not allowing doctors to use this cheap, generic drug to treat COVID-19. Why? [This short video](#), "**The Untold Story of a "Miracle Drug"**" lays it out— perfectly.
4. Co-authors Dr. Peter McCullough and journalist John Leake write in the Epoch Times: 'Oral and or nebulized [steroids](#) have been a part of the FLCCC and McCullough protocols since 2020. Justification for early steroids sadly comes from an autopsy study of fatal cases by Kato et al who evaluated 61 cases from the NIH, Cornell, and University of North Carolina Chapel Hill. Read the entire article [HERE](#).
5. Last month, FLCCC filed its [amicus brief](#) in the Supreme Court of Wisconsin for the lawsuit against Aurora Health Care, Inc. for refusing a patient's desire for— and access to — ivermectin; a safe and potentially lifesaving treatment for COVID-19. Learn more or [read the full amicus brief HERE](#).
6. From decreased immunity to autoimmune and inflammatory/histamine responses, micro clotting and amyloidosis, neurologist Dr. Diane Counce summarizes five ways in which the body responds to injuries from COVID shots. Read the article [HERE](#). Dr. Kory shared how possibly the biggest issue is: "Most neurologists do not treat brain inflammation. Most doctors aren't taught about subradiographic, subclinical testing and neuroinflammation, and we know that is central to so many of our patients' problems."
7. The overarching message was very hopeful though. If you are vax injured, you are not alone, and there are solutions. You can watch the entire webinar [HERE](#).
8. OK. This description of our Dr. Been's new video is a wee bit technical, but bear with us here. This video discusses **Nattokinase**, a thrombolytic, spike protein degradative, and anti-aging enzyme produced by Bacillus subtilis. Nattokinase is made by fermenting soybeans with Bacillus subtilis. Fear of Covid Is the Opiate of the People

Like any old school respiratory virus, this one made us feel lousy, albeit with a different constellation of symptoms. We handled it the same way as other viral illnesses: we drank extra water, took some home remedies, and tried to get some extra sleep. A few years ago, no one made a big deal about, or needed to categorize, being sick like this. People rode it out. No one cared what you had. Or didn’t have.

Time to Rethink the Core Question: What Is Health Care?

The health policy worldview determines its success only in the fact that they have controlled the individual health decisions. Any mistakes in policy will be taken into account in the next decision. There never is a policy failure as long as the decision makers remain in charge to tell us what is best. The individual worldview requires that each patient be treated uniquely, with a personal relationship with a doctor viewing their needs and desires as important and unique. This attitude is wholly counter to centralized control of all health care decisions.

Did National Security Imperatives Compromise COVID-19 Vaccine Safety?

Definition of these vaccines as “countermeasures” rather than therapeutic agents has permitted their expedited progression to emergency use authorisation and widespread rollouts. Many adverse consequences have been the outcome of this secret military response to a public health matter. Why are governments around the world, including Australia, planning to make further significant investments in this rushed vaccine technology driven by the US military?

WSJ Latest to Suggest COVID Vaccines May Be Fueling New Variants

The author of an op-ed published this week in the Wall Street Journal suggested COVID-19 vaccines could be fueling new variants — a theory posited as far back as August 2021 by vaccinologist Geert Vanden Bossche.

How anyone can look at the Covid vaccination and mortality metrics of New Zealand, Australia, and Japan and still hold fast to the ‘safe and effective’ vaccine narrative is beyond comprehension. State Power and Covid Crimes: Part 1

Governments were able to mobilise members of the public to exert peer pressure and societal coercion to enforce compliance, backed by often brutal police coercion against pockets of resistance and protest. In retrospect, it's doubtful if the degree of state and social coercion deployed to increase vaccine uptake would have been possible without the ground having first been prepared with lockdowns and masks.

Fauci Fibbed on the Day Everything Changed

The entire mess began not just with a bad prediction but an outrageously bad falsehood – spoken in front of deeply ignorant and terrified politicians – one that was followed by an egregious demand that we get rid of normal social and market functioning. The consequences are for the ages. Fauci had his own masters and minions but it is impossible to avoid the reality that he bears primary responsibility as the voice of panic that shut down freedoms hard won over a millennium.
