mind blowing that this stuff is happening and not a peep from mainstream media! Multiple MD's are also interviewed explaining the many adverse events (cancers, etc. ... the large increase in stillbirths is shocking). It's just unbelievable the huge coverup we're seeing.

React19 is a science-based non-profit offering financial, physical, and emotional support for those suffering from long-term COVID-19 vaccine adverse events globally. Our mission is to bring healing to the moms, dads, friends, and loved ones who are facing life-altering side effects from their COVID-19 vaccine. We build bridges between patients and research institutions in order to develop a better understanding of our vaccine complications.

Jim>Here's a snippet from below report (I've added the emphasis) - this is maddening!: **'To prevent one COVID-19 hospitalisation** over a 6-month period, we estimate that 31,207–42,836 young adults aged 18–29 years must receive a third mRNA vaccine. Booster mandates in young adults are expected to cause a net harm: per COVID-19 hospitalisation prevented, we anticipate at least **18.5 serious adverse** events from mRNA vaccines, including **1.5–4.6 booster-associated myopericarditis** cases in males (typically requiring hospitalisation). We also anticipate **1430–4626 cases of grade ≥3 reactogenicity interfering with daily activities** (although typically not requiring hospitalisation).'

Jim> Appreciate Dr. Malone's commentary on the Died Suddenly documentary. I've been leery of Stew Peters from early on. That said, I was glad to see a focus on these blood clotting issues in a way that while shocking, might actually break thru the censoring/gaslighting and let people see what is happening. It's so discouraging when folks aren't allowed to see the potential for adverse events and death. The other side is responsible for many deaths because of this. Our side isn't perfect, and some fighters cross lines that shouldn't be crossed. Perhaps they mean well but are just desperate to get eyes opened in this crazy environment. That doesn't make it right... But maybe what Stew has put together here will open some eyes, and when these folks eyes open, they will find the truth tellers like Dr's Malone, McCullough, etc. that are fighting the noble and honest battle.

Jim> Excellent take on Died Suddenly by an MD. My wife and I watched it last night and even though I've been very aware of these clotting issues, it was still shocking to see them being pulled out of dead bodies. I know there are some mistakes made in it (esp that huge clot being removed from the beating heart), but

the facts of grainy micro clots and those long fibrous clots shouldn't be ignored, and I'm hoping it gets more people's attention maybe waking more up to the truth of these mRNA shots. Unfortunately the fact checkers and mainstream media will focus on the few mistakes and probably succeed at discrediting it.

"One of the tragic consequences of COVID-19 vaccination I have come across is the rapid onset of (often fatal) dementia in elderly individuals. Because the elderly often lack the ability to advocate for themselves and are no longer considered a priority by our society, these deaths have been quite easy to sweep under the rug (not to mention the countless other elders who needlessly died of other causes throughout the pandemic)."

“Since January 1, in the laboratory I’m seeing a 20 times increase of endometrial cancers over what I see on an annual basis,” reported Dr. Ryan Cole.

Dr. Cole — who will be a speaker at the FLCCC’s upcoming inaugural [education conference](#) — said the vaccines seem to be causing serious autoimmune issues, in a way he described as a “reverse HIV” response.

According to Cole, in patients with HIV, there is a massive suppression of “helper T-cells” which causes immune system functions to plummet — leaving the patient more susceptible to a variety of illnesses. Similarly, Cole describes that, “post-vaccine, what we are seeing is a drop in killer T-cells, in CD8 cells. And what do CD8 cells do? They keep all other viruses in check.”

German Researchers Examine Covid “Vaccines” and Vaccinated People’s Blood and Say Stop Vaccinations

The German Working Group for Covid-19 Vaccine Analysis has made its ‘Summary of Preliminary Findings’ publicly available. In a wide-ranging report dated 6 July, the Group described the toxic substances found in all Covid-19 “vaccine” samples analysed and the marked changes seen in blood samples taken from vaccinated people. The Group also found that the greater the stability of the envelope of lipid nanoparticles, the more frequent the vaccine side effects.

After Data Show Vaccinated at Higher Risk of Dying From COVID, Canadian Province Ends Monthly Reports

After the Manitoba, Canada, public health agency reported data showing those fully vaccinated (not boosted) for COVID-19 are at higher risk of dying from the virus compared to unvaccinated individuals, health officials stopped reporting on the data — a trend seen in other countries, including Scotland, the U.K. and the U.S.

Viruses do not simply change how they kill from one year to the next. Something happened in C19-involved deaths after 2020 that changed how C19 purportedly kills people. Pneumonia and respiratory issues dominated 2020, the year of C19; but something insidious has doubled and tripled relative numbers of circulatory system deaths after 2020. The Massachusetts DPH cannot hide from this. Either there is massive fraud in coding of deaths or some intervention in 2021 and 2022 caused deaths or both are true at the same time.

Attack from within After COVID-19 Vaccination

With the genetic vaccines, particularly mRNA, for the first-time human cells are forced to produce a highly abnormal, pathogenic Spike protein. When is mRNA not really mRNA?

What is pseudouridine, why is it being injected into you, and why should you care.

By Robert W Malone MD, MS

Jim>This is a good article, read the whole thing, but here's a snippet from the conclusion:

“In conclusion, based on these data it is my opinion that the random and uncontrolled insertion of pseudouridine into the manufactured “mRNA”-like molecules administered to so many of us creates a population of polymers which may resemble natural mRNA, but which have a variety of properties which distinguish them in a variety of aspects which are clinically relevant. These characteristics and activities may account for many of the unusual effects, unusual stability, and striking adverse events associated with this new class of vaccines. These molecules are not natural mRNA, and they do not behave like natural mRNA.

The question that most troubles and perplexes me at this point is why the biological consequences of these modifications and associated clinical adverse effects were not thoroughly investigated before widespread administration of random pseudouridine-incorporating “mRNA”-like molecules to a global population.”

6 facts about CDC denial that deaths linked to vaccines

1. The CDC did not exclude COVID vaccines as the cause of death in any of the 4,471 deaths reported to VAERS
2. The CDC did not actively track vaccine recipients to catch all deaths and other side effects
3. The CDC found that deaths following COVID vaccines were “concentrated” in the first few days after vaccination
4. The CDC downplayed death and injury rates

As of 6 February 2022, based on publicly available official UK and US data, all age groups under 50 years old are at greater risk of fatality after receiving a COVID-19 inoculation than an unvaccinated person is at risk of a COVID-19 death. All age groups under 80 years old have virtually no benefit from receiving a COVID-19 inoculation, and the younger ages incur significant risk.

JAMA STUDY:

Myocarditis Cases Reported After mRNA-Based COVID-19 Vaccination in the US From December 2020 to August 2021

Findings: In this descriptive study of 1626 cases of myocarditis in a national passive reporting system, the crude reporting rates within 7 days after vaccination exceeded the expected rates across multiple age and sex strata. The rates of myocarditis cases were highest after the second vaccination dose in adolescent males aged 12 to 15 years (70.7 per million doses of the BNT162b2 vaccine), in adolescent males aged 16 to 17 years (105.9 per million doses of the BNT162b2 vaccine), and in young men aged 18 to 24 years (52.4 and 56.3 per million doses of the BNT162b2 vaccine and the mRNA-1273 vaccine, respectively).

Dr. Bhakdi discusses Burkhardt's work in this video:

<https://www.bitchute.com/video/fHIT55iM4Zv9/>. He says the t-lymphocytes attack the organs

because the organs are expressing the spike proteins, and that is what the t-lymphocytes were trained to attack. Bhakdi says that it gets worse with increasing number of vaccinations, though 4 of the people had only had 1 injection. He says the blood vessels become leaky due to the first vaccine, and then with the second vaccination the mRNA leaks through the leaky blood vessels into the organs.

Additionally, the following may be of interest:

They reported "there was an increase in the risk of myocarditis within a week of receiving the first dose of both adenovirus and mRNA vaccines, and a higher increased risk after the second dose of both mRNA vaccines." They suggested that "vaccine mediated expression of SARS-CoV-2 surface spike protein on the surface of cardiomyocytes could potentially trigger an immunologic response resulting in organ-specific cell death[19,20]."

New Research Shows Why the COVID19 “Vaccines” are Killing Professional Athletes

-snippet from report.

The study was from the [Bristol Medical School](#) in the UK and published in [Clinical Science](#). In brief, the paper showed that the spike protein of the SARS-CoV-2 can disrupt cardiac pericyte functions independent of a COVID19 infection.

The research found that spike proteins by eliciting pro-inflammatory cytokines such as tumor necrosis [factor-alpha](#) (TNF- α), [interleukin-1 beta](#), [IL-1 \$\beta\$](#) , [interleukin-6 IL-6](#), and [monocyte chemoattractant protein-1 MCP1](#). The same cytokines are increased in patients with severe

COVID-19 that have cytokine storms. The cytokines then cause damage to the heart muscles and form blood clots.

The spike proteins also stimulate ERK1 and ERK2 and impair the “teamwork” of the pericytes and endothelial cells. The result is the death of endothelial cells. Once it dies, the cardiac blood vessels can not dilate to meet the demands of a rapidly beating heart.

If we MASS vaccinate using vaccine that does NOT sterilize the virus, while there is ongoing massive infectious pressure, & while population immunity is mounting, then natural selection will factor in

This has been the fear of GVBossche and he has been correct, and I too call on the vaccination to stop immediately as natural selection will select for highly infectious mutants as it is NOW!

I & we (Geert vanden Bossche, Yeadon, Malone, Alexander) have argued that these imperfect 'leaky' COVID vaccines could actually enhance transmission of highly virulent variants; we were right!

Can some vaccines drive evolution of more infectious variants? Traditional belief is that natural selection culls lethal pathogens if host death greatly reduces transmission; an evolutionary dead-end

Risk of myocarditis following sequential COVID-19 vaccinations by age and sex

<https://www.medrxiv.org/content/10.1101/2021.12.23.21268276v1>

- For younger males receiving a second dose of mRNA-1273 vaccine, the risk of myocarditis was higher following vaccination than infection
- In summary, the risk of hospital admission or death from myocarditis is greater following COVID-19 infection than following vaccination and remains modest following sequential doses of mRNA vaccine including a third booster dose of BNT162b in the overall population.
- However, the risk of myocarditis following vaccination is consistently higher in younger males, particularly following a second dose of RNA mRNA-1273 vaccine.

Notes and recommendations for conducting post-mortem examination (autopsy) of persons deceased in connection with COVID vaccination

Dr. Burkhardt and colleagues recently carried out a series of 17 autopsies on persons deceased within days to months of vaccination. Initially, none of these deaths had been attributed to the vaccines. Nevertheless, Dr. Burkhardt and colleagues found characteristic lesions in multiple organs which led them to conclude that in most patients the vaccines were likely the cause of death.

Significantly elevated cardiac risk caused by the vaccines justifies an immediate halt
The researchers who confirmed the results from the Circulation paper won't publish their results because they are worried about losing their research funding in the future. So don't tell anyone, OK?
