

COVID-19 INFORMATION

TESTING, PCR, ETC

PCR cycle count thresholds above 25 means detecting viral dust and fragments & old coronavirus and NOT culturable infectious COVID; why was it then set at 40 & 45 in US & Canada? 95% false positives!

CDC, NIH, Health Canada of Canada, all globe's health agencies set cycle counts above 35 & this meant 90% of all positives were not, we closed down school, business, society NOT for real COVID; Senger

A Short History of the Testing Debacle

Federal health agencies have had more blunders than practically anyone expected during this pandemic. The least that Uncle Sam can do is get out of the way of private efforts to help Americans recognize the risks in their own lives.

Mass Testing: The Fatal Conceit

While contact tracing and isolation may be important for some infectious diseases, it is futile and counterproductive for common infections such as influenza and Covid-19. A case is only a case if a person is sick. Mass testing asymptomatic and non-vulnerable individuals is harmful to public health, useless and expensive.

Testing Mania: Illogical and Harmful

Instead of massively testing everyone on demand, testing should be leveraged to do what everything should have been geared toward in the first place—protecting the high-risk, saving lives, and opening society up as soon as possible.

CDC/FDA Smoking Gun of Smoking Guns

They confess: they had no virus when they concocted the test for the virus; they “contrived” a model by pretending to find what they wanted to find; it’s called a self-fulfilling prophecy

We've been saying for over a year these PCR tests are a joke...now Fauci admits it!

Listen to what FAUCI says here minute 6:25 on, and tell me you dont want to jump off a building; this beast locked us down for 2 years and closed schools due to a POSITIVE RT-PCR test, listen now

It is either he is insane, stupid, or is malfeasant...this ***** with the other beasts in public health and these corrupted TASK Forces shut all down based on a positive PCR test; was I dreaming?
