HATE FOR UNVACCINATED

This section shows how authorities are implementing programs and making statements that incite people to hate those that choose to not get the Covid vaccine. The most recent info is added at the top of this document.

Superego, Id, and the Mandated Job

Vaccine mandates hit hard in the late summer and fall of 2021. Get the job or lose your job. Health care workers and public sector employees had it especially bad. Somehow it seemed right. If you are interacting with the public in a health capacity, you need to be sure you won't infect anyone. If you are a government employee, surely the government should be able to tell you what you have to take to make everyone else safe.

The Criminalization of the Ordinary

How can we go back to living in just one world? Was it all an illusion in the first place? Is it just that the veil has been drawn back, and now we (or I) see the true horror of reality? What took me so long? How I long for a reconciliation of those two worlds, where there is a shared understanding of truth, where we can at least confront problems together, on the same side. Until something changes, I must try to be a citizen of these two mutually exclusive worlds.

Covid and the Three Tests of Compliance

From legend and literature, this is how things usually are presented, not with one inviting temptation to go along but rather with three chances to comply, each with assurance that all will be well if we just give up our recalcitrant desire to think and act for ourselves. At each stage, every one of us faces enormous pressure, and not just from government but also from family, friends, and coworkers.

Covid Theology in the Australian Church

By closing the church door to the unvaccinated, many were embracing a malicious apostasy that we have not seen since Franco. From July 2021 to mid-2022, vaccine passports were used in churches loyal to the state. What it meant was someone could go to church with the flu, hepatitis, syphilis, herpes, and early onset of Ebola, if they had their Covid Vaccination Certificate.

If We Only Knew

Moral endurance is a problem these days. Empathy is low, and not just on the pro-narrative side. I don't know about you but the feeling I can't quite ignore or reconcile these days, something I am not proud of as an ethicist or a human being, is a palpable feeling of being numb. Numb to the repetition of history's atrocities, numb to the laziness of the compliant who helped to create the world in which we now live, numb to inauthentic pleas for amnesty.

Creating an enemy of the state requires [othering](#): a process of [dehumanizing](#) through marginalizing a group of humans as something different, less than, and other. Such othered groups become an easy target to scapegoat, unfairly bearing the blame for a society’s ills.
